**JOINT CASE MANAGEMENT  
CONFERENCE STATEMENT**

Date: January 13, 2020  
Time: 2:00 p.m.  
Dept.: Courtroom 8  
Judge: Honorable Lucy H. Koh

1 Plaintiff Corephotonics, Ltd. (“Corephotonics”) and Defendant Apple Inc. (“Apple”) jointly  
2 submit this Case Management Statement in anticipation of the Case Management Conference  
3 scheduled for January 13, 2021. (Dkt. No. 31). Other than Section II, which details the current status  
4 of the IPR and Federal Circuit proceedings, this Case Management Statement is substantively identical  
5 to the Case Management Statement filed on September 2, 2020 (Dkt. No. 30).

6 Each of the above-captioned related patent infringement cases remains stayed by Order of the  
7 Court. *See* Dkt. No. 29 (May 7, 2020 Order Regarding Joint Case Management Statement); Case No.  
8 17-cv-06457, Dkt. No. 112 (June 1, 2020 Order Denying Motion to Lift Stay). Neither party intends  
9 to move to lift the stay at this time.

## 10 **I. JURISDICTION AND SERVICE**

11 This is a patent infringement action. This Court has subject matter jurisdiction over this action  
12 at least under 28 U.S.C. § 1331 and 28 U.S.C. § 1338(a). Venue is proper in this Court pursuant to 28  
13 U.S.C. §§ 1391 and 1400(b). All named parties have been served and there are no unresolved issues  
14 relating to service of process.

## 15 **II. FACTS**

16 On October 14, 2019, Corephotonics brought a patent infringement suit against Apple in the  
17 United States District Court for the Northern District of California. In this case, numbered 19-cv-4809,  
18 Corephotonics contends that Apple has and continues to willfully infringe ten of Corephotonics’  
19 patents relating to smartphone camera technology, in particular, small form-factor telephoto lens  
20 assembly and dual lens control and imaging technologies. The patents in suit are United States Patent  
21 Nos. 9,661,233 (the “’233 patent”), 10,230,898 (the “’898 patent”), 10,233,840 (the “’840 patent”),  
22 10,317,647 (the “’647 patent”), 10,324,277 (the “’277 patent”), 10,330,897 (the “’897 patent”),  
23 10,225,479 (the “’479 patent”), 10,015,408 (the “’408 patent”), 10,356,332 (the “’332 patent”), and  
24 10,326,942 (the “’942 patent”) (collectively “the Asserted Patents”). Corephotonics respectfully  
25 directs the Court to Corephotonics’ Complaint (*see* Dkt. No. 1), which provides a detailed description  
26 of Corephotonics’ claims in this case.

27 The Asserted Patents in Case No. 19-cv-4809 are related to the five patents currently asserted  
28 by Corephotonics against Apple in two previously-filed actions in this Court, which are respectively

numbered 17-cv-06457-LHK and 18-cv-02555-LHK. On October 7, 2019, the Court issued an order relating this case with Corephotonics' two previously-filed actions. Dkt. 16. As noted above, all of the related Corephotonics matters are stayed by Order of the Court. *See* Dkt. No. 29 (May 7, 2020 Order Regarding Joint Case Management Statement); Case No. 17-cv-06457, Dkt. No. 112 (June 1, 2020 Order Denying Motion to Lift Stay).

Since the Court's order continuing the case management conference on September 3, 2020, the Patent Trial and Appeal Board ("PTAB") has instituted IPR proceedings on all patents asserted in 19-cv-4809:

<u>Asserted Patent No.</u>	<u>PTAB IPR No.</u>	<u>Date Filed</u>	<u>Status</u>
9,661,233	IPR2020-00487	February 28, 2020	Instituted on November 5, 2020
10,015,408	IPR2020-00488 IPR2020-00489	February 5, 2020	IPR2020-00489: Instituted on July 31, 2020  IPR2020-00488: Not instituted on July 31, 2020
10,225,479	IPR2020-00905 IPR2020-00906	May 6, 2020	Both IPRs Instituted on November 12, 2020
10,230,898	IPR2020-00861	May 6, 2020	Instituted on December 9, 2020
10,288,840	IPR2020-00877	April 30, 2020	Instituted on November 3, 2020
10,317,647	IPR2020-00896	May 5, 2020	Instituted on December 8, 2020
10,324,277	IPR2020-00897	May 4, 2020	Instituted on December 8, 2020
10,326,942	IPR2020-00860	May 1, 2020	Instituted on November 5, 2020

<u>Asserted Patent No.</u>	<u>PTAB IPR No.</u>	<u>Date Filed</u>	<u>Status</u>
10,330,897	IPR2020-00878	May 1, 2020	Instituted on November 3, 2020
10,356,332	IPR2020-00862	May 6, 2020	Instituted on December 9, 2020

Since the Court's September 3, 2020 Order, the Federal Circuit proceedings on the patents Asserted in 17-cv-06457 and 18-cv-02555 have continued, but to date none of the appeals have reached oral argument or had a decision issued:

- *Corephotonics, Ltd. v. Apple Inc.*, No. 20-1424 (Fed. Cir.) (appeal from IPR challenging U.S. Patent No. 9,402,032): Briefing complete. Oral argument not yet scheduled.
- *Corephotonics, Ltd. v. Apple Inc.*, No. 20-1425 (Fed. Cir.) (appeal from IPR challenging U.S. Patent No. 9,538,152): Briefing complete. Oral argument not yet scheduled.
- *Apple Inc. v. Corephotonics, Ltd.*, No. 20-1438 (Fed. Cir.) (appeal from IPR challenging U.S. Patent No. 9,568,712): Briefing complete. Oral argument not yet scheduled.
- *Corephotonics, Ltd. v. Apple Inc.*, No. 20-1961 (Fed. Cir.) (appeal from IPR challenging U.S. Patent No. 9,857,568): Corephotonics' opening brief filed on November 17, 2020. Briefing is currently stayed pending intervention of the U.S. Patent and Trademark Office.

### III. LEGAL ISSUES

The principal disputed legal issues are:

- Whether any of the accused products identified in Corephotonics' Complaint (Dkt. No. 1) and Infringement Contentions to be served on Apple pursuant to P.L.R. 3-1 directly or indirectly infringe any asserted claims of the Asserted Patents, literally or under the doctrine of equivalents;

- Whether Apple induced infringement of the Asserted Patents by its customers or others within the United States;
- Whether Apple's alleged infringement of the Asserted Patents was and continues to be willful;
- Whether any or all of the claims of the Asserted Patents are invalid and/or unenforceable;
- Whether any or all of the claims of the Asserted Patents are patent-ineligible;
- Construction of any disputed patent claim terms from the Asserted Patents;
- Whether this case is exceptional under 35 U.S.C. § 285;
- Whether Corephotonics is entitled to damages, and if so the amount;
- Whether Corephotonics is entitled to injunctive relief to prevent Apple's continuing infringement.

#### IV. MOTIONS

No motions have been filed by either side. The anticipated motions identified below would be filed by Corephotonics in the event the Court lifts the stay at a later date.

##### Corephotonics' Anticipated Motion to Amend Complaint:

**Corephotonics' Statement:** Corephotonics was issued U.S. Patent Nos. 10,437,020 (the "'020 patent") and 10,488,630 (the "'630 patent") on, respectively, October 8, 2019 and November 26, 2019. Both '020 and '630 patents issued from continuation applications of several of the Asserted Patents, including the '897 patent and '647 patent. The '020 and '630 patents are also related by continuation to patents asserted in the previously-filed actions, such as U.S. Patent Nos. 9,568,712 (the "'712 patent") and 9,857,568 (the "'568 patent"). Based on Corephotonics' investigation, Apple's iPhone 7 Plus, 8 Plus, X, XS, XS Max, 11, 11 Pro, and 11 Pro Max, each infringe one or more claims of the '020 and '630 patents. Corephotonics plans to file a motion to amend the complaint to include claims of infringement of the '020 patent and '630 patent at the appropriate time when the stay of these cases is lifted by the Court.

**Apple's Statement:** For the reasons set forth in prior Case Management Statements, Apple continues to disagree with Corephotonics' proposal to file a motion to amend the Complaint to add

1 two more patents to this ten patent case, which is currently stayed. (*See* Dkt. No. 26 at 4; Dkt. No. 28  
2 at 4-5.)

3 Corephotonics’ Anticipated Motion to Amend Infringement Contentions in Case Nos. 17-cv-  
4 06457-LHK and 18-cv-02555-LHK:

5 **Corephotonics’ Statement:** As set forth in the parties’ previous joint case management  
6 statement, Corephotonics plans to file a motion to amend its infringement contentions to add Apple’s  
7 iPhone XS and XS Max to the case as accused products for the ’712 patent. When the Court lifts the  
8 stay, Corephotonics will meet and confer with Apple about adding the iPhone XS and XS Max to the  
9 case. In addition, Corephotonics will confer with Apple on adding the 11 Pro and 11 Pro Max models  
10 as accused products for the ’712 patent, which is currently asserted in both the 17-cv-06457-LHK and  
11 18-cv-02555-LHK cases. The iPhone 11, 11 Pro, and 11 Pro Max products were announced on  
12 September 10, 2019. Based on Corephotonics’ investigation and review of publicly available  
13 materials, the iPhone 11 Pro and 11 Pro Max products infringe at least claim 14 of the ’712 patent.

14 **Apple’s Statement:** As discussed above, neither party has moved to lift the current stay in any  
15 of the three pending Corephotonics cases (17-cv-06457, 18-cv-02555 and 19-cv-4809). In the event  
16 the Court later lifts the stay, Apple will meet and confer in good faith with Corephotonics on any  
17 proposed amendments to contentions.

## 18 V. AMENDMENTS OF PLEADINGS

19 **Corephotonics’ Statement:** As explained above in Section IV, Corephotonics anticipates  
20 seeking the Court’s permission to amend its Complaint to add claims of infringement of the ’020 and  
21 ’630 patents.

22 **Apple’s Statement:** As explained above in Section IV, Apple disagrees with Corephotonics’  
23 request to amend the complaint to include the ’020 and ’630 patents. Apple believes that the current  
24 stay in all three of the Corephotonics cases (17-cv-06457, 18-cv-02555 and 19-cv-4809) should be  
25 continued until all of the IPRs have reached a final resolution, including appeals.

## 26 VI. EVIDENCE PRESERVATION

27 The parties have reviewed the District’s Guidelines Relating to Electronically Stored  
28 Information (“ESI”). The parties have met and conferred regarding taking reasonable and proportional

1 steps to preserve evidence relevant to the issues reasonably evident in this action.

## 2 **VII. DISCLOSURES**

3 The parties have not yet served their initial disclosures.

## 4 **VIII. DISCOVERY**

### 5 **A. Discovery to Date**

6 Corephotonics served requests for production under Federal Rule of Civil Procedure 34 on  
7 January 24, 2020.

### 8 **B. E-Discovery Order and Protective Order Issues**

9 The parties agree that the ESI Order and Protective Order issued by the Court in related case  
10 17-cv-06457-LHK will govern this action as well. *See* Dkt. 77 and 78, 17-cv-06457-LHK.

### 11 **C. Issues Relating to Privilege and Privilege Log**

12 The parties will work cooperatively to reach agreement on issues concerning privilege and  
13 privilege logs that is consistent with the needs of the case.

### 14 **D. Scope of Anticipated Discovery**

15 Pursuant to Rule 26(b)(1), the parties anticipate that the scope of discovery will encompass the  
16 factual and legal issues identified in the detailed description of Corephotonics' claims of Apple's  
17 willful infringement of the Asserted Patents provided in its Complaint (Dkt. No. 1), including any  
18 unique issues presented by Corephotonics' claims of infringement of the '020 and '630 patents if they  
19 are added to the case.

### 20 **E. Changes to Discovery Limitations**

21 The parties agree that a one-day, seven hour deposition of an individual deposed in both their  
22 individual capacity and in their capacity as a 30(b)(6) representative counts as a single deposition for  
23 the purposes of the limit of ten party depositions as in Fed. R. Civ. P. 30(a). The parties further agree  
24 that the depositions of expert witnesses should not count towards the ten deposition limit. The parties  
25 currently do not propose any changes to the default discovery limitations. To the extent the cases are  
26 not stayed, the parties will confer about consolidating aspects of discovery between this case and the  
27 previously-filed cases, and will bring any proposed changes to discovery limitations to the Court's  
28 attention at an appropriate time.

1 **IX. CLASS ACTION**

2 This case is not a class action.

3 **X. RELATED CASES**

4 On October 7, 2019, the Court issued an order relating this case with Corephotonics' two  
5 previously-filed actions at 17-cv-06457-LHK and 18-cv-02555-LHK. *See* Dkt. 16.

6 **XI. RELIEF**

7 **Corephotonics' Statement:** Corephotonics seeks a finding of an award of damages resulting  
8 from the acts of Apple's infringement, including, without limitation, no less than a reasonable royalty  
9 pursuant to 35 U.S.C. § 284, together with interests and costs; an award of enhanced damages pursuant  
10 to 35 U.S.C. § 284 due to Apple's willful infringement; injunctive relief against Apple engaging in  
11 infringement of the Asserted Patents; Corephotonics' costs; and such other relief at law and in equity  
12 as the Court may deem just and proper. Corephotonics further outlines its claims for damages below.  
13 Corephotonics further seeks a finding that this is an exceptional case under 35 U.S.C. § 285 and an  
14 award of Corephotonics' reasonable attorney's fees in connection with this action. Insofar as the Court  
15 does not enter a permanent injunction, Corephotonics seeks a compulsory forward royalty.

16 **Apple's Statement:** Apple denies the allegations of infringement, including willful  
17 infringement, and contends that the asserted patent claims are invalid. Apple has not asserted any  
18 counterclaims to date, and it does not currently seek any damages. Apple reserves the right to seek an  
19 award of costs, expenses, and/or reasonable attorneys' fees in connection with this action should this  
20 prove to be an exceptional case, as well as any other award that the Court deems just and proper.

21 **XII. SETTLEMENT AND ADR**

22 The parties have conducted two mediations with the Hon. Mag. Judge Gandhi (Ret.), most  
23 recently on February 11, 2020, at JAMS in downtown Los Angeles. The parties have not yet reached  
24 a resolution through the mediation.

25 **XIII. CONSENT TO MAGISTRATE JUDGE FOR ALL PURPOSES**

26 The parties do not consent to have a magistrate conduct all further proceedings including trial  
27 and entry of judgment.  
28

1 **XIV. OTHER REFERENCES**

2 At this time, the parties do not believe that this case is suitable for reference to binding  
3 arbitration, a special master, or the Judicial Panel on Multidistrict Litigation.

4 **XV. NARROWING ISSUES**

5 Currently, the parties have no suggestions to expedite the presentation of evidence at trial or  
6 any requests to bifurcate issues, claims, or defenses.

7 **XVI. EXPEDITED TRIAL PROCEDURE**

8 At this time, the parties do not believe that this case is appropriate for the Expedited Trial  
9 Procedure of General Order No. 64 Attachment A.

10 **XVII. SCHEDULING**

11 **Parties' Statement:** If the Court lifts the stay in any of the 17-cv-06457-LHK, 18-cv-02555-  
12 LHK, and 19-cv-4809 cases, the parties will meet and confer to discuss scheduling in an effort to  
13 proposes a suitable case schedule for those cases.

14 **XVIII. TRIAL**

15 Corephotonics and Apple have demanded that the case be tried by jury. The parties understand  
16 that the Court holds trial Mondays, Tuesday, and Fridays from 9:00 am to 4:30 pm.

17 **Corephotonics Statement:**

18 If issues unique to the claims asserted in the 19-cv-4809-LHK case are to be tried alongside  
19 Corephotonics' claims in the 17-cv-06457 and 18-cv-02555 cases, Corephotonics expects to be able  
20 to narrow the scope of the claims and defenses such that parties would not require more than five (5)  
21 days for a trial.

22 **Apple's Statement:**

23 If the trial were to involve multiple claims and patents, up to and including the 17 asserted  
24 patents identified by Corephotonics thus far, Apple expects that trial could take at least fifteen (15) or  
25 more court days.

26 **XIX. DISCLOSURE OF NON-PARTY INTERESTED ENTITIES OR PERSONS**

27 Pursuant to paragraph 19 of the Standing Order for All Judges re Contents of Joint Case  
28 Management Statement, the parties have filed Certifications of Interested Entities or Persons as

1 required by Local Rule 3-15.

2 **Corephotonics' Statement:** Samsung Electronics Benelux B.V. owns a majority of the  
3 outstanding shares of Corephotonics. No publicly-held corporation owns 10% or more of  
4 Corephotonics' stock. *See* Dkt. 8.

5 **XX. PROFESSIONAL CONDUCT**

6 The parties confirm that all attorneys of record for the parties have reviewed the Guidelines  
7 for Professional Conduct for the Northern District of California.

8 **XXI. OTHER MATTERS**

9 Pursuant to Patent Local Rule 2-1, the parties have also met and conferred regarding the  
10 following additional matters:

11 **a. Patent Local Rule 2-1(b)(1): *Proposed modification of the obligations or***  
12 ***deadlines set forth in the Patent Local Rules***

13 Because the litigation is stayed, the parties have not proposed any modification to the  
14 obligations or deadlines set forth in the Patent Local Rules. In the event the stay is later lifted, the  
15 parties will present their proposals at such time.

16 **b. Patent Local Rule 2-1(b)(2): *The scope and timing of any claim construction***  
17 ***discovery including disclosure of and discovery from any expert witness***  
18 ***permitted by the Court***

19 Because the case is stayed, the parties have not proposed any changes to scope and timing of  
20 claim construction discovery. In the event the stay is later lifted, the parties will present their proposals  
21 at such time.

22 **c. Patent Local Rule 2-1(b)(3): *The format of the claim construction hearing,***  
23 ***including whether the Court will hear live testimony, the order of***  
24 ***presentation, and the estimated length of the hearing***

25 Because this case is stayed and any remaining scope of the case may change pending the  
26 outcome of the outstanding IPRs, the parties have not proposed any specific format for the hearing or  
27 the estimated length of the hearing. In the event the stay is later lifted, the parties will present their  
28 proposals at such time.

1                   **d. Patent Local Rule 2-1(b)(4): *How the parties intend to educate the Court on***  
2                   ***the technology at issue***

3                   Because this case is stayed, the parties will present their proposals about a technical tutorial in  
4                   the event the stay is later lifted.

5                   **e. Patent Local Rule 2-1(b)(5): *Non-binding, good-faith estimate of damages***  
6                   ***range***

7                   Corephotonics' Statement: The precise calculation of Corephotonics' damages depends on  
8                   information that is not presently in Corephotonics' possession. While Corephotonics reserves the right  
9                   to rely on licenses or other agreements which are comparable to a license that would result from a  
10                  hypothetical reasonable royalty negotiation, and it will identify such licenses in its possession, control,  
11                  or custody pursuant to P.L.R. 3-2(g), Corephotonics anticipates further discovery regarding the  
12                  following and other matters with respect to the computation of the damages due to Corephotonics, by  
13                  way of example:

14                  (i) license or other agreements in Apple's possession which may be comparable to a license  
15                  that would result from a hypothetical reasonable royalty negotiation,

16                  (ii) the extent of Apple's infringement of Corephotonics' Asserted Patents and its impact,

17                  (iii) Apple's financial and sales data concerning products accused of infringement,

18                  (iv) information relating to the value, benefit, sales and profit that Apple derived from the  
19                  infringing features of Apple's products accused of infringement, including, by way of example,  
20                  analyses and information related to the pricing of Apple products and accused features, and competing  
21                  products and features; market analyses, market projections and market forecasts performed by or on  
22                  behalf Apple; Apple's sales and marketing practices; and Apple's market research, consumer research,  
23                  surveys, business analytics, projections, and metrics concerning Apple's products and the accused  
24                  features, as well as competing products and features, and

25                  (v) the extent to which Apple's infringement drives or assists Apple in the sale of non- patented  
26                  features and products.

1 Corephotonics further notes that damage computations will be the subject of expert testimony.  
2 Further, the damages, costs and attorneys' fees due to Corephotonics will continue to accrue during  
3 the course of this litigation making the computation premature.

4 Apple's Statement: Apple contends that it does not infringe the Asserted Patents and that the  
5 asserted claims of the Asserted Patents are invalid. On that basis, Apple believes that Corephotonics  
6 is entitled to no damages. Additional factors supporting Apple's contention include the limited scope  
7 of the claimed inventions; that any differences between the Asserted Patents and the prior art are trivial  
8 and Apple's patent licensing history. To the extent Corephotonics is due any damages for the alleged  
9 infringement (which Corephotonics does not specify in its "non-binding, good-faith estimate" above),  
10 additional discovery is necessary for Apple to provide a more specific expected damages range,  
11 including Corephotonics' service of infringement contentions, discovery regarding Samsung's  
12 acquisition of Corephotonics and any related license obligations, discovery regarding any valuations  
13 of Corephotonics and/or its patent portfolio related to the Samsung acquisition, discovery from  
14 Corephotonics concerning its licensing policies and practices (if any), and Corephotonics' production  
15 of agreements concerning the license or transfer of any rights in the Asserted Patents (including the  
16 financial terms on which those rights were conveyed). Apple intends to offer expert testimony on  
17 damages at the appropriate time.
